

NEW PROMED PRODUCTS

Anthos Dental Chairs now available from Promed!

Promed is pleased to announce that we are now the sole distributor of Anthos chairs in the Republic of Ireland.

Anthos, Italy's leading manufacturer of dental equipment, delivers treatment centres designed to suit each dentist's personal operating style.

Design, versatility, quality and user-friendliness are the key values of this brand, which is renowned worldwide in the dental profession for the past 60 years.

Anthos prides itself on the sheer scope of its range and versatility of every single dental unit. In addition to single units, Anthos supplies comprehensive work islands that provide everything needed by today's dentist, with a strong focus on design, efficiency and cost.

Cefla Dental Group firmly believes in reliability, a feature incorporated in every single one of its production processes. Their mission is to seek out solutions and develop products that boost the dentist's ability to make accurate diagnoses and provide effective treatment for pathologies of the oral cavity.

Classe R7

**Made-to-measure surgeries**

The extensive range of solutions offered by Classe R7 makes the very most of available surgery space and provides dentists with a personalised workplace. Classe R7 is available as a stand-alone patient chair on which an operating light can be incorporated: a configuration specially designed for dental surgeons who need plenty of space, a sturdy chair with gentle movement and ergonomic shaping.

Assistant's module

In addition to a light and LCD monitor, the chair can be equipped with an assistant's module. In surgeries equipped with central wet loop suction systems the dentist's module arm can be fixed to the version with assistant's module but without unit body.

Cart option available

In addition to the possibility of converting the unit from a right-handed model to a left-handed one (this simple conversion can be completed by one person in just seconds), Classe R7 is now available with a Mobile Cart.

One unit, a hundred solutions

Thanks to its versatility, the Classe R7 offers ergonomic solutions that make it ideal for all operating styles. The modular configuration of the Classe R7 allows dentists to personalise units according to their specific operational and workplace requirements.

Anthos Dental Units

**R7: the evolving range**

Increasingly flexible solutions are offered by the evolution of the Classe R7 range, the universal ambidextrous unit that offers modular configurations for maximum personalisation of the working environment. It is possible to choose from basic versions with dental chair only to top-of-the-range versions offering a complete integrated treatment centre with dentist's module and assistant's module, unit body, light, monitor and X-ray units.

Anthos Classe A3 plus

Simple and flexible

The new Classe A3 Plus unit brings you flexibility and simplicity. Up-to-date hygiene systems in conformity with European directives, accessories which add real value and multimedia options which help toward refining your professional approach. With Classe A3 Plus, Anthos offers you numerous ways to personalise your treatment centre.

Also available for left-handed professionals

Classe A3 Plus is available with reflex arm instruments (also for left-handers) and can be supplied with a shorter fixed arm for smaller environments.

Anthos Dental Units

Anthos Classe A5

A treatment centre tailored to your needs
 The new Classe A5 stands out by virtue of its versatility and variety of configurations. Integration of hygiene systems compliant with international standards, a wide range of accessories, new specially designed upholstery and a high-tech multimedia system allows the dentist to personalise the treatment centre according to their individual needs.

Anthos Dental Units

Anthos Classe A6 plus

Decisive practicality

A key feature of the Classe A6 Plus unit is its undeniable practicality. Right where the dental surgeon needs to be surrounded by elements designed to answer his requirements, both as a whole and with regard to each individual aspect, every detail has been made to provide optimum solutions in terms of practicality. From the removable stainless steel tray-holder which can be freely positioned according to need to the vertically adjustable arm of the assistant's module.

Total operating comfort

Easier chair and instrument control means the dental team can focus their efforts on the patient. Simple, user-friendly controls and the clarity of the information available to the dentist ensure optimal operating conditions.

Anthos Dental Units

Anthos Classe A7 plus

Digital efficiency

Thanks to digital electronics on the Classe A7 Plus unit, the dentist is able to use state-of-the-art instruments such as the brushless micromotor. Moreover, automatic digital hygiene systems such as BIOSTER, are available for spray circuit disinfection as well as the automatic suction system wash and sanitising device.

Flexible and reliable

Latest generation digital electronics not only guarantees outstanding reliability, but offers flexibility which allows for easy, fast updating of the electronic board, thus enabling new instruments to be added in the future.

Continental – fluidity and interaction

Design and performance have been brought together to provide a treatment centre that is perfect for dentists who value fluid workflows, smooth teamwork and, first and foremost, reliability and practicality. The Continental version with transthoracic instrument delivery has been conceived for the dentist who uses reflex arm instruments.

International – modularity and versatility

The new dentist's module on the International version is ideal for dentists who use hanging tube instruments. Ergonomic instrument layout ensures everything is within easy reach. The large tray holder module and highly manoeuvrable pantograph arm allow the dentist to work with confidence, interacting smoothly with the assistant.

Anthos Dental Units

Anthos Classe A9

Adapts to all working styles

Anthos Classe A9 offers an effective, comprehensive response to the wide-ranging needs of dental surgeries. A compact, versatile treatment centre, Classe A9 features cutting-edge ergonomics, giving the dentist outstanding performance, unparalleled practicality and great styling. Classe A9 makes the most of space and grants absolute freedom of movement.

All-round hygiene

Classé A9 features all-round hygiene system. Complete with a series of integrated devices that assure hygiene inside and outside the surgery, numerous design features are incorporated to provide a response to each specific need, making routine cleaning tasks and hygiene procedures easier and more effective than ever.
