PERFORMANCE

First for enhanced practice and revenue generation

Advance your practice with advanced products...

Promed Advance Performance

Advance PERFORMANCE products include:

- **ECG**
- **Ambulatory BP**
- **Holter ECG**
- **Spirometry**
- **Stress ECG**
- **Cryotherapy**
- **Earcare**
- **Warfarin management**

Early detection is critical to patient care and with the Promed Advance PERFORMANCE products you can offer additional services to your patients. Our payment plans allow you to introduce these services on a cost neutral basis, pay for them as you see the patients – ask your account manager to explain how it works.

The Advance PERFORMANCE package that accompanies each product allows you to immediately offer the service to your patients. Initially our Service Engineers will install, commission and train your team how to use the product, we will also service the product annually for 2 years ensuring that it is always working accurately and correctly.

With a selection of the PERFORMANCE products you will get free access to an online training course to help you get started and if the diagnosis is not straight forward why not take advantage of our free 2nd opinion. Promed have established an arrangement with The Cardio Clinic where Advance PERFORMANCE product users can obtain a 2nd Opinion from a leading Cardiologist – ask your account manager for more details.

Promed Advance PERFORMANCE allows you to offer more services to your patients, increase the patient screening services carried out in primary care and generate more income for your practice.

Full details of all our Advance PERFORMANCE products can be found on our website www.promed.ie
